- JavaScript/Jquery/DOM/Node.js
- APIs
- Express
- MySQL/MongoDB
- React

Graduated with a certificate in coding through University of Washington Web Development bootcamp.

////////////////////////////////////

Front-End

A fun app to create your date night when you don't know what to do. This project utilizes Jquery, API's, DOM, Local Storage, CSS, and HTML.

[Date Night App](#)

////////////////////////////////////

Full-Stack

An online store developed for a business in Bellingham. This was our third project in the bootcamp. At this point the app is not currently in use in the real world and it may never see real use but, non the less, the experience was invaluable.

[Litzia Online Store](#)

A unique application that allows a business to create reviews and profiles for customers. The business may create reviews for any customer in the database and also edit or delete any previous review they may have written. Password encryption is utilized.
